

DATA IMAGE CORP. INTRODUCES ADVANCED OUTDOOR MONITOR SOLUTIONS

Redefining Durability, Visibility, and Performance in Extreme Environments

Data Image Corp., a provider of industrial monitor solutions, introduces its latest Outdoor Monitor Display product line designed for tough environments. Expanding beyond its outdoor display modules, the company now offers fully integrated industrial monitors built for long-term reliability in demanding applications.

Specializing in outdoor industrial monitors, Data Image Corp. supplies solutions for outdoor payment terminals, parking meters, EV charging stations, and more. These rugged monitors withstand extreme temperatures, offer high brightness, and maintain clear visibility in direct sunlight. Whether used in industrial settings, outdoor kiosks, or other HMI devices, Data Image's monitors are built to perform where standard screens fail.

Featuring optical bonding technology and an open-frame design, these monitors provide durability, improved contrast, and reduced glare, making them ideal for 24/7 outdoor operation. Additional features include anti-vandalism protection, outdoor touch capability, and an advanced cooling system, ensuring reliable operation in harsh conditions. Available in sizes from 10.1 inches to 43 inches, these monitors meet the growing need for rugged outdoor solutions.

With this launch, Data Image Corp. continues to provide industrial monitor solutions that deliver durability and clarity in challenging environments.
