

**Subject: Alcom electronics nv/sa and BV acquired by Steliau International**

Dear valued business partner,

Alcom electronics is pleased to announce the completion and closing of the acquisition by Steliau International. Alcom electronics will be teaming up with Steliau International, having its HQ in Paris, being active in different European countries and currently having offices in France, Italy, Spain, Portugal, Belgium and the Netherlands.

Both Steliau International and Alcom electronics are recognized as true leaders in its field by both customers and suppliers. Core competences are centralized around a wide spectrum of semiconductors, passives and electromechanical components; HMI & display; connectivity; mechatronics; embedded systems; thermal solutions and energy conversion. As partner in leading edge technologies, we are offering a high level of dedicated services including the personal human touch. The expanded group of companies is on a mission to create a sales and support platform to be the preferred European running-mate in electronic value add solutions.

The change in shareholder structure does not have any effect on the operational side meaning that installed current practices and relationships with your Alcom contact persons, including the management & leadership team, will remain unchanged.

At Alcom we are on a renewed and entrepreneurial mission. Also in the future, Alcom electronics will support its business partners with specialism, knowledge and design-in expertise.

If you have questions regarding this acquisition or if there is anything we can assist you with, please do not hesitate to contact us via your current contact person or undersigned. We look forward to continuing our successful partnership with your organization and embracing a promising future.
