

Consumer Display

Extensive Applications in All Types of Scenarios

Vivid, Sharp Picture Quality with Integrated Touch for More Intuitive Control

AUO Display Plus consumer display panels can be used in a wide variety of scenarios including home printers, digital cameras, digital video cameras and portable navigation devices. In addition to high resolutions, lightweight, thinness and energy-efficiency, we also offer custom specifications and one-stop touch solution to meet the operating requirements of different consumer electronic products.

High Brightness and Wide Operating Temperature

A maximum brightness of up to 1,000 nits means information can be clearly displayed even under strong sunlight outdoors.

Wide temperature liquid crystal technology allows the products to withstand temperatures between $-20^{\circ}\text{C} \sim 70^{\circ}\text{C}$, making it suitable for all kinds of demanding outdoor environments.
