**eMMC flash memory**

These products address the needs of industrial and embedded computing manufacturers that have been hit by discontinuations from large memory manufacturers. *The entire memory portfolio focuses on longevity and long-term availability. Most of our products can be used as form, fit and function drop-in replacement memory products for our industrial customers, sparing them from costly and time-consuming re-designs and qualifications.*"

DDR memory components

The company focuses on legacy memory products for industrial applications and offers DRAM components as well as DRAM modules ranging from SDRAM to DDR4 in addition to its customizable NAND flash memory portfolio. All memory products are available in a range of capacities and configurations.

LPDDR4

Low-density LPDDR4 with 4Gb capacity. All of these require the quality and longevity that the company's products provide.
