DIGI CONNECTCORE 8M MINI

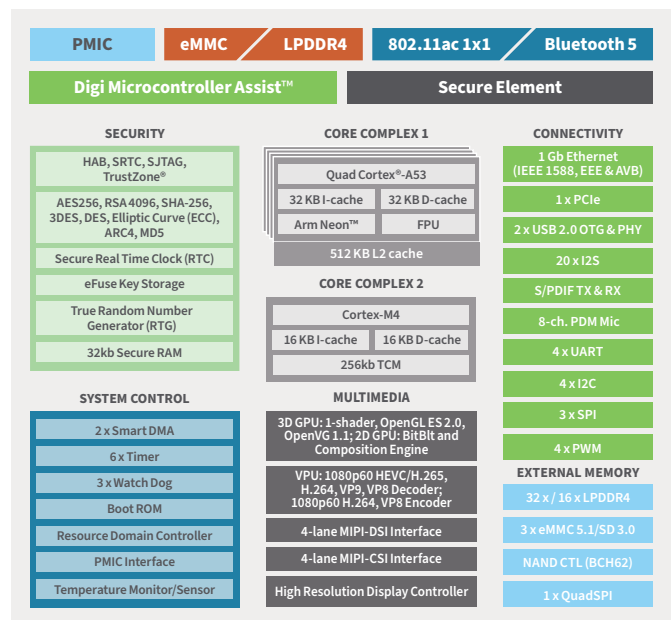

Embedded system-on-module based on the NXP i.MX 8M Mini processor with built-in security; designed for longevity and scalability in industrial IoT applications

Digi ConnectCore® 8M Mini, based on the NXP® i.MX 8M Mini application processor, is a secure integrated system-on-module (SOM) platform. The Mini is designed for a wide range of industrial, medical, agricultural and transportation applications, including Internet of Things (IoT), human-machine interface (HMI), equipment monitoring, audio/voice, graphics/video, edge computing and machine learning.

Digi ConnectCore 8M Mini features four power-efficient Arm® Cortex®-A53 cores, one Cortex-M4 core, and the Digi Microcontroller Assist Cortex-M0, which allow it to minimize power consumption while maintaining a high standard of performance.

With a 10+ year product lifecycle, OEMs can reduce their development costs and achieve a lower total cost of ownership by leveraging pre-certified wireless connectivity, remote management, cloud integration, and complete Linux Yocto Project and Android software platform support.

BENEFITS

- Industrial i.MX 8M Mini quad-core system-on-module
- Digi SMTplus® form factor (40 mm x 45 mm) for ultimate reliability and design freedom
- Power management with both hardware and software support for low-power designs
- Display and camera capabilities with graphics and video hardware acceleration
- Video capabilities with built-in VPU
- Pre-certified dual-band 802.11a/b/g/n/ac 1x1 and Bluetooth® 5 connectivity
- Seamless cellular modem and Digi XBee® wireless integration
- Cloud and edge-compute services integration
- Built-in device security, identity and privacy with Digi TrustFence® and a hardware Secure Element
- Remote management with Digi ConnectCore® Cloud Services
- Digi Embedded Yocto Linux® and Android support
