

Highly Integrated Global Frequency Bands

- 5G SA/NSA
- 5G/4G/3G compatible
- 7nm compact design
- Quad-core Arm Cortex-A55 processor
- Data and voice can be transmitted concurrently

Blazing-Fast Speed and Extended Coverage

Highly integrated 5G NR FR1 modem to support 5G NR Sub-6GHz frequencies and 2CC CA

5G + Wi-Fi 6 Connectivity

High-speed 5G 2x2+2.4G 2x2 dual-band Wi-Fi 6 coverage for Enterprise/Home/Venues

Fibocom FG360 will be available in two versions, FG360-EAU will be launched for EMEA/APAC markets, and FG360-NA will be launched for the North American market, mainly for smart terminals such as fixed wireless access (FWA), CPE, gateways, routers, industrial monitoring terminals, and telemedicine terminals. **The FG360 5G module plans to achieve mass production in Q3 2021.**
