Battery Charger Modules

Ag102

Ag102 is Silvertel's first intelligent battery charger module specifically designed to maximise battery life and reduce power consumption using optimised charging techniques and a high efficiency DC-DC converter. Perfect for reducing call-out, maintenance and battery replacement costs this eco-friendly module can be used with 12V sealed lead acid batteries between 1.2Ah and 7Ah capacity

Ag103

Ag103 is Silvertel's first battery charger module intended specifically for use with a wide range of Solar Panels. Maximum Power Point Tracking and intelligent charging profiles still optimise battery charge times and lifetime, thereby reducing call-out, maintenance and battery replacement costs.
